## 1. How Your Boutique Storefront Works

Fairy Finds Boutique combines the beauty of an online designer catalog with the speed and personal touch of direct WhatsApp ordering. There is no complicated checkout cart for Indian customers—clients select their piece and connect directly with you on WhatsApp!

VISUAL DIAGRAM: THE FAIRY FINDS CUSTOMER ORDER FLOW

## 2. Logging In & The Admin Dashboard

### Accessing the Portal

#### Admin URL:

<https://fairyfindsboutique.store/admin>

**Boutique Passkey:** **fairyfinds@123** (or your custom password)

You can open this link on your phone (iPhone or Android) or your desktop computer. Enter your passkey to access your stock and boutique settings.

**Pro-Tip:** On Safari (iPhone) or Chrome (Android), tap "Add to Home Screen" to create an app icon directly on your phone!

### Dashboard Overview

Once logged in, you will see your master overview showing:

- **Total Products:** Count of all dresses in the catalog.
- **In-Stock Health:** Instant alert on items low in stock.
- **Quick Buttons:** "+ Add Product", "Homepage CMS", and "Live Website".

Click "**View Live Storefront**" at any time in the top right to verify how your store looks to the public.

### The Admin Sidebar Menu

**Products & Stock:** Add, edit, price, or hide garments.

**Homepage CMS:** Edit banners, hero text & layout order.

**Store Settings:** WhatsApp number, email & address.

**Categories:** Garment types (Sarees, Kurthis, Blouses).

**Customer Reviews:** Add client reviews & star ratings.

**Navigation Menu:** Top header & footer links.

**Collections:** Curated edits (Festive, Bridal, Velvet).

**SEO & Discovery:** Google search titles & keywords.

**Sign Out:** Securely log out when finished.

### 3. Adding & Managing Products (Your Main Day-to-Day Task)

Whether you receive a fresh batch of Banarasi silk sarees, finish a custom velvet lehenga, or create ready-to-wear kurtis, adding them to your website takes less than 2 minutes.

VISUAL DIAGRAM: STEP-BY-STEP PRODUCT CREATION FLOW

#### 1 Navigate to Products & Stock

Click **"Products & Stock"** in the sidebar. Click the bright pink **" + Add New Product "** button at the top right.

#### 2 Fill in Garment Essentials

**Product Name:** Use an attractive title (e.g. *"Crimson Banarasi Katan Silk Saree"*).

**Product Code (SKU):** Unique code for the atelier (e.g. FF-RS-005). Auto-generated for you!

**Price (₹):** The retail price in Rupees (e.g. 18500). No commas or symbols needed.

**Category & Collection:** Select where this dress belongs (e.g. Category: *Sarees*; Collection: *Festive Edit*).

#### 3 Fabric Composition & Care Guide (Important for Boutique Clients)

Shoppers love details! Specify the fabric (e.g. *"100% Pure Mulberry Silk with Antique Gold Zari"*) and care instructions (e.g. *"Dry clean only. Store wrapped in pure muslin cloth."*). This builds trust and prestige.

#### 4 Setting Size Variants & Stock Count

You can add multiple sizes (e.g., **S:** 2 in stock, **M:** 3 in stock, **L:** 0 in stock) or simply choose **"Free Size (Saree)"**.

**How Automatic "Sold Out" works:** When the stock reaches 0, the website automatically shows an elegant *"Sold Out / Inquire on WhatsApp"* badge so you never disappoint a customer!

#### 5 Uploading Photos & Featured Switch

Click or drag up to 6 high-res photos into the upload area. The first photo is your master display image.

Toggle **"Feature on Homepage"** to **YES** if you want this garment showcased on the main front page!

## 4. Categories vs. Curated Collections

To keep your boutique organized like a luxury Parisian or Milanese fashion house, garments are organized in two ways:

### Categories (Garment Types)

Permanent garment classifications that help shoppers filter your shop catalog:

- **Sarees:** Silk, Organza, Banarasi, Linen.
- **Kurithis & Kurtas:** Casual, Festive, Designer.
- **Blouses & Tops:** Hand-embroidered bridal tops.
- **Dresses & Gowns:** Western & fusion party wear.

**Tip:** You rarely need to change categories once set up.

### Collections (Curated Themes)

Seasonal or artistic themes that change throughout the year:

- **Onam Festive Heritage Edit:** Kasavu & gold zari.
- **Emerald Velvet Bridal Story:** Micro-velvet lehengas.
- **Pastel Symphony:** Soft lavender & peach georgette.
- **Christian Wedding Atelier:** Ivory & silver bespoke gowns.

**Tip:** Create new collections for festivals, seasons, or special drops!

## 5. Customizing the Homepage CMS (Without Coding)

The front page of your website is modular. You can change announcements, update banners, and rearrange sections in seconds from "**Homepage CMS**".

### VISUAL DIAGRAM: MODULAR HOMEPAGE LAYOUT SECTIONS

ANNOUNCEMENT BAR: "Bespoke Bridal Tailoring & Ready-to-Wear Delivery Across India"

#### HERO BANNER

Editorial Image & Main Headline

#### CATEGORY GRID

Sarees • Kurithis • Blouses

#### FEATURED COUTURE

Curated Bestsellers Grid

#### CLIENT REVIEWS

5-Star Testimonials Slider

### How to Reorder Sections

Want customer reviews higher on the page? Or want to put Featured Products above Collections?

1. Go to **Homepage CMS**.
2. Use the **↑ Up** and **↓ Down** arrow buttons next to any section.
3. Click "**Save Layout**". Your live website updates immediately!

### How to Hide / Show Sections

Don't have new reviews ready yet? Or want to temporarily hide the festival banner after Onam?

- Toggle the green "**Visible**" switch to **Hidden**.
- The section instantly disappears from the public website without deleting your data.
- Switch it back on whenever you are ready!

## 6. Customer Reviews & Client Testimonials

Nothing converts hesitant online brides faster than seeing real, glowing reviews from previous customers in Kottayam, Kochi, Bangalore, Dubai, and the US!

### Adding a New Client Review

1. Click **"Customer Reviews"** in the sidebar.
2. Click **" + Add Review"**.
3. Enter the **Client Name** (e.g. *"Dr. Meera N."*).
4. Enter their **Location** (e.g. *"Kottayam, Kerala"* or *"Dubai, UAE"*).
5. Set the **Star Rating** (typically 5 Stars).
6. Paste their **Feedback Quote** (from WhatsApp or Instagram).
7. Optional: Upload a photo of the client wearing the outfit!
8. Click **"Save Review"**.

### Best Practices for Reviews:

- Highlight custom fit ("The blouse fit like a glove on the first try!").
- Mention speedy delivery ("Delivered to Bangalore in 2 days").
- Include NRI experiences ("Ordered from the UK for my sister's engagement, flawless stitching!").

**Did You Know?** These reviews also generate Google Schema data automatically, helping your boutique display gold stars in search results!

## 7. Store Settings & WhatsApp Ordering Details

All your fundamental boutique information lives in **"Store Settings"**. If your WhatsApp phone number, shop timings, or address change, you can update them in seconds.

| SETTING FIELD    | WHAT IT CONTROLS                                                             | EXAMPLE & BEST PRACTICE                                                                     |
|------------------|------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------|
| WhatsApp Number  | The phone that receives all direct customer order chats and custom requests. | +91 62826 29144<br><i>Always include country code (+91)</i>                                 |
| Store Name       | Displays in browser tabs, receipts, and website header.                      | Fairy Finds Boutique                                                                        |
| Announcement Bar | The highlight marquee strip running across the very top of the website.      | "Bespoke Bridal Tailoring & Ready-to-Wear Delivery Across India • WhatsApp +91 62826 29144" |
| Contact Email    | Public inquiries and business correspondence.                                | hello@fairyfindsboutique.com                                                                |
| Instagram URL    | Links visitors directly to your Instagram profile.                           | https://instagram.com/fairyfinds.boutique                                                   |
| Atelier Address  | Physical location shown on Contact page and Google Maps schema.              | Neendoor, Kottayam, Kerala - 686601                                                         |

**Crucial Check:** If you change your WhatsApp number in Store Settings, test it immediately by opening your live website on your phone, clicking a product's "Order on WhatsApp" button, and confirming your WhatsApp opens with the pre-filled message!

## 8. Search Engines (Google, Bing) & AI Discovery (ChatGPT, Perplexity)

Your website has an advanced, built-in **SEO & Discovery Control Panel** specifically tuned for women's fashion in Kerala, NRI bridal shopping, and AI answer engines.

### VISUAL DIAGRAM: HOW SEARCH ENGINES & AI DISCOVER YOUR BOUTIQUE

### Why Google Doesn't Update Instantly

**Important Fact:** When you update a title or description in your admin panel, it is **instantly live on your website**. However, Google Search only updates when its crawler (Googlebot) revisits your URL.

Google saves a *cached copy* of your site. It can take anywhere from 24 hours to a few days for Google to refresh its search snippet.

#### How to Fast-Track Google (24-48 Hours):

1. Open [Google Search Console](#).
2. Paste your page URL in the top search bar.
3. Click **"Request Indexing"**. Google puts you at the front of the queue!

### AI Search (ChatGPT, Perplexity & Copilot)

Today, thousands of shoppers ask AI: *"Where can I find a custom bridal blouse tailor in Kottayam?"*

Your website is equipped with **/llms.txt**—an international AI standard that provides structured knowledge directly to ChatGPT, SearchGPT, Perplexity AI, Claude, and Apple Intelligence.

**Bing & Copilot:** Enter your *Bing Webmaster Token* in the Technical tab to ensure instant inclusion in Microsoft Copilot, Bing, and Yahoo!

## 9. Boutique Photography Guidelines (Maximize Sales)

You do not need an expensive photography studio! An iPhone or modern smartphone in good lighting will produce gorgeous luxury photos. Follow these 4 rules:

### Natural Daylight

Shoot near large windows or an open doorway between 10 AM and 3 PM. Avoid yellow room bulbs.

### Clean Background

Use a neutral off-white, beige, or pale pastel wall. Keep the floor clean and uncluttered.

### Portrait (3:4 Ratio)

Always hold your phone vertically! Fashion garments look best in tall portrait orientation.

### Detail Close-Up

Always include 1 close-up photo of the embroidery, zari weave, or neckline craftsmanship.

## 10. Frequently Asked Questions & Troubleshooting

### Q1: A customer bought a saree in our Neendoor shop. How do I update the website?

**Answer:** Go to **Products & Stock**, click on the saree, reduce the stock count to 0 (or delete the item if it will never be restocked), and click **"Update Product"**. The website will immediately update!

### Q2: How do I offer a temporary holiday sale or discount announcement?

**Answer:** Go to **Store Settings**, change the **Announcement Bar** text to: "🎉 *Festive Season Special: Enjoy Complimentary Shipping on Orders Across Kerala!*", and click Save. It appears across all pages instantly.

### Q3: Can I manage the website while traveling using only my mobile phone?

**Answer:** Yes! The admin portal is 100% mobile-friendly. You can upload photos directly from your phone camera, adjust prices, edit stock, and toggle visibility from anywhere.

### Q4: What should I do if a product photo appears sideways or blurry?

**Answer:** Make sure the photo was saved in standard orientation on your phone before uploading. For best results, use JPG or PNG images under 5MB each.

### Need Technical Assistance or Custom Features?

Your website engineering team is always here to assist with new features, seasonal overhauls, or database backups. **Fairy Finds Web Team**
